Portfolio | Engineering Playbook | Change Blueprint

---

## SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development (React.js, Node.js, FastAPI) and applied machine learning (PyTorch, Retrieval-Augmented Generation, QLoRA fine-tuning). Skilled in RESTful API development, Agile software delivery, and building end-to-end, production-ready software and AI systems.

## EDUCATION

**BML Munjal University** Gurugram, Haryana

*B.Tech in Computer Science and Engineering | CGPA: 8.55 / 10.0 Aug 2023 – May 2027*

CBSE Board – Class XII Science (82.4%) & Class X (93.33%), Delhi

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, C++, SQL

**Frontend Development:** React.js, Tailwind CSS

**Backend Development:** Node.js, Express.js, FastAPI

**Databases:** MySQL, MongoDB

**Version Control & API Development:** Git, GitHub, REST APIs

**Big Data:** PySpark

**Machine Learning & AI:** PyTorch, HuggingFace Transformers, QLoRA, FAISS, Streamlit

**Core Concepts:** Object-Oriented Programming (OOP), System Design, Agile Methodology, Retrieval-Augmented Generation (RAG), Feature Engineering, Data Modeling

## EXPERIENCE

**UniSphere BMU** Gurugram, Haryana

*Web Developer Intern — Full-Stack Development Apr 2025 – Apr 2026*

- Developed and maintained scalable modules across a multi-module platform, integrating RESTful API endpoints to enable seamless cross-module communication.
- Engineered reusable React.js components shared across platform modules, improving UI consistency and accelerating feature delivery in a large-scale codebase.
- Collaborated in Agile/Scrum development cycles, aligning multi-module feature rollouts with performance benchmarks and quality objectives through iterative feedback.

## PROJECTS

**Alchemist: AI-Driven Software Generation Framework** Jan – May 2026

*GitHub | Python, FastAPI, React.js, Tailwind CSS, JavaScript*

- Architected a multi-source AI system ingesting PDFs, GitHub repositories, and prompts to auto-generate complete, structured software projects end-to-end.
- Built a FastAPI backend with a selective merge engine to synthesize multi-format inputs into production-ready scaffolds with automated ZIP project delivery.
- Developed a React.js frontend with workflow automation, reducing project bootstrapping effort through seamless UI-to-backend integration.

**HealthLens: Domain-Specific Medical QA System (RAG-Based)** Jan – May 2026

*GitHub | Python, PyTorch, HuggingFace Transformers, QLoRA, FAISS, Streamlit*

- Fine-tuned a Phi-2 large language model (LLM) using QLoRA parameter-efficient fine-tuning for domain-specific clinical question answering with high factual accuracy.
- Built a Retrieval-Augmented Generation (RAG) pipeline with FAISS vector indexing and sentence-transformer embeddings to reduce hallucinations and ground responses in verified documents.
- Enforced input/output safety guardrails to detect and block unsafe medical queries, ensuring responsible and compliant AI deployment.

## ACHIEVEMENTS & ACTIVITIES

**Smart India Hackathon (SIH) 2023 Finalist**

National Level

- Selected as a national finalist among thousands of teams in India's largest government-sponsored hackathon, developing a technology solution for real-world problem statements.

**National Service Scheme (NSS) BML Munjal University**

*Executive Committee Member 2024*

- Served as an elected member of the NSS Executive Committee, coordinating community outreach initiatives and social impact programs at the institutional level.
